Education

University of Texas at Dallas May 2028
B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship *Richardson, TX*

- **Coursework:** Human–Computer Interaction, Software Engineering, Database Systems, Data Structures & Algorithms, Computer Networks, Object-Oriented Design

Experience

ThirdSpaceDigital Jan. 2026 – Present
Product Designer & Frontend Developer *Dallas, TX*

- Led UX from research through delivery: conducted user research and usability testing with early community members, then iterated Figma prototypes into a production React experience that reached **300** users in week one.
- Built and maintained a reusable Figma design system—components, patterns, and documentation using Auto Layout, Variants, Tokens, and Component Properties—so article, event, issue, and archive surfaces stayed consistent across web and mobile (iOS/Android) breakpoints.
- Established visual hierarchy and brand identity for the community platform; wrote clear usage guidelines and documentation so designers and developers could implement components correctly.

Vinson Process Controls May–Aug. 2025; May–Aug. 2026
Software Engineering Intern *Richardson, TX*

- Partnered with product stakeholders in an Agile environment to define user stories and ship a React/Tailwind monitoring UI that cut repetitive operator steps; shortcut workflow improved efficiency by **1200%**.
- Prototyped and refined high-fidelity interface patterns for real-time controls, collecting stakeholder feedback and turning critiques into actionable design improvements across two terms.

Codeaify Jun.–Aug. 2024
Software Engineering Intern *Dallas, TX*

- Designed and built a React UI over Python/SQL services for guardrails and PII workflows; documented interaction patterns so client teams could adopt features with less support overhead.
- Raised automated test coverage to **95%** and improved compliance by **20%**, treating quality gates as part of a trustworthy product experience.

JPMorgan Chase Jun.–Aug. 2023
Software Engineering Intern *Houston, TX*

- Designed a React dashboard that clarified Cassandra metrics with strong visual hierarchy, **doubling** actionable insight; presented findings to **15+** managers (**98%** rating).

Projects

Tactile | *Figma Plugin API, Auto Layout, Variants, React, FastAPI, MediaPipe* Jan. 2026

- Built a gesture-driven Figma plugin that streams roughly **60 FPS** hand tracking into design actions, extending how designers move and edit frames without leaving the canvas.
- Standardized repeating interaction patterns across four architecture iterations; added accessible fallbacks and responsive breakpoints aligned with iOS and Android mobile UI conventions.

T-Moodbile | *Figma, FigJam, React, Next.js, PostgreSQL* Nov. 2025

- Mapped product flows in FigJam and Figma, then shipped a sentiment dashboard where clear visual hierarchy helped support teams prioritize churn risk from one interface.

Technical Skills

UX & Design Systems: Figma (Auto Layout, Variants, Tokens, Component Properties), design system, prototyping, visual hierarchy, brand identity, user research, usability testing, user stories, documentation, usage guidelines
Product & Platforms: iOS/Android mobile UI patterns, accessibility, responsive design, FigJam, Agile, stakeholder communication
Build: React.js, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Figma Plugin API
