Education

University of Texas at Dallas May 2027
B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship *Richardson, TX*

- **Coursework:** Data Structures & Algorithms, Advanced Algorithms, Computer Networks, Linux/Unix, Computer Architecture, Automata Theory

Experience

Vinson Process Controls May–Aug. 2025; May–Aug. 2026
Software Engineering Intern *Richardson, TX*

- Integrated REST services with MySQL persistence for an edge-computing RTU, enabling reliable real-time monitoring and configuration while reducing manual operator checks.
- Containerized the application and standardized CI/CD orchestration, lowering deployment effort, environment drift, and the engineering cost of scaling installations across two internship terms.
- Built React/Tailwind operational views that surfaced equipment statistics and controls in fewer interactions, improving user efficiency by 1200% and helping technicians prevent costly downtime.

Codeaify Jun.–Aug. 2024
Software Engineering Intern *Dallas, TX*

- Developed FastAPI/PostgreSQL services for applications, policy guardrails, and PII encryption, centralizing compliance controls and reducing manual handling of sensitive customer data.
- Reached 95% unit-test coverage across LangChain guardrails and encryption flows with Cucumber, improving AI-engine compliance by 20% and reducing production defects and time spent debugging client issues.

UTD EPICS Comet Cupboard Jan.–May 2024
Developer *Richardson, TX*

- Migrated MongoDB to PostgreSQL/Prisma, cutting query times by 60% and lowering staff wait time and infrastructure overhead for a nonprofit food-assistance platform.
- Replatformed Svelte to React TypeScript and packaged with Docker, reducing framework fragmentation, environment failures, and future maintenance effort.

JPMorgan Chase Jun.–Aug. 2023
Software Engineering Intern *Houston, TX*

- Queried and transformed Cassandra transaction and cluster metrics into analysis-ready data, replacing repetitive extraction and doubling actionable insight output.
- Presented a React/CQL visualization to 15+ project managers and earned a 98% performance rating, helping teams catch costly performance risks earlier.

Projects

T-Moodbile | *Node.js, Express, PostgreSQL, Gemini, Twilio, Next.js* Nov. 2025

- Engineered an event-driven pipeline that records AI voice surveys, transcribes audio, classifies sentiment, and persists actionable insights, automating analysis otherwise performed manually.
- Consolidated hourly Reddit and daily Trends data in PostgreSQL; five-minute checks against a 70% threshold triggered deduplicated alerts to reduce analyst effort and churn risk.

Tactile | *FastAPI, WebSockets, MongoDB, MediaPipe, React* Jan. 2026

- Built a FastAPI/WebSocket event layer that streams roughly 60 FPS MediaPipe gesture data into Figma with low-latency updates, reducing repetitive design input.
- Persisted frame state, gesture events, sessions, snapshots, and patch history in MongoDB, supporting reliable recovery and faster iteration across four gesture-map rewrites.

Technical Skills

Backend: Python, Java, C++, SQL, FastAPI, Flask, Node.js, Express, REST APIs, WebSockets, LangChain
Data & Infrastructure: PostgreSQL, MySQL, MongoDB, Cassandra, Prisma, Docker, AWS, CI/CD, Git/GitHub
Frontend: React.js, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS
