Education

University of Texas at Dallas May 2028

B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship *Richardson, TX*

- **Coursework:** Data Structures & Algorithms, Advanced Algorithms, Software Engineering, Human–Computer Interaction, Databases, Operating Systems, Computer Networks

Experience

Vinson Process Controls May–Aug. 2025; May–Aug. 2026

Software Engineering Intern *Richardson, TX*

- Built and shipped full-stack, user-facing React/Tailwind product features for an edge-computing RTU, integrating REST APIs and MySQL into real-time monitoring and configuration workflows.
- Collaborated with users and an Agile engineering team to break down features and iterate on a shortcut workflow, improving user efficiency by 1200%; maintained Docker/CI/CD deployment infrastructure.

ThirdSpaceDigital 2026

Frontend Developer & Product Designer *Dallas, TX*

- Translated Figma prototypes into a responsive React/Supabase product spanning articles, events, issues, and photo archives, creating reusable workflows from design through production.
- Ran growth-oriented experiments and iterated after launch, attracting 300 users in the first week, sustaining roughly 55 daily visits, and retaining recurring traffic for months.

Codeaify Jun.–Aug. 2024

Software Engineering Intern *Dallas, TX*

- Developed Python/FastAPI and PostgreSQL services plus a React UI for LLM guardrails and PII encryption, delivering privacy and security features across infrastructure and product layers.
- Built and maintained Cucumber tests to 95% coverage, participated in peer code review, and improved AI-engine compliance by 20% while reducing production defects.

UTD EPICS Comet Cupboard Jan.–May 2024

Software Engineering Developer *Richardson, TX*

- Modernized a nonprofit platform from Svelte to React/TypeScript and MongoDB to PostgreSQL/Prisma, improving query performance by 60% and simplifying future development.
- Partnered with teammates to plan, document, and ship Dockerized features and infrastructure for staff serving students experiencing food insecurity.

Projects

Tactile | *Figma Plugin API, FigJam, React, FastAPI, WebSockets, MediaPipe* Jan. 2026

- Built a real-time Figma collaboration tool that converts roughly 60 FPS hand tracking into design actions and synchronizes editable frames through a WebSocket bridge.
- Designed the pull/edit/push system from Figma snapshots to derived frames; iterated through four gesture-map rewrites and added four responsive breakpoints plus accessible input fallbacks.
- Used GitHub Copilot, Cursor, and Claude as AI-assisted development tools to prototype, debug, and optimize code; used FigJam to map product flows and team decisions.

T-Moodbile | *TypeScript, Next.js, Node.js, PostgreSQL, Gemini* Nov. 2025

- Collaborated with a three-person software/design team to ship an end-to-end AI sentiment workflow, from Figma planning through APIs, testing, deployment, monitoring, and iteration.

Technical Skills

Languages & Product: C++, JavaScript, TypeScript, Python, Java, React.js, Next.js, Tailwind CSS, Figma Plugin API

Platform & Security: Distributed Systems, System Design, REST APIs, WebSockets, FastAPI, Node.js, PostgreSQL, MongoDB, Supabase, Docker, CI/CD, PII Encryption

Engineering: Data Structures & Algorithms, Clean Code, Unit Testing, QA, Peer Code Review, Documentation, Agile, Git/GitHub, GitHub Copilot, Cursor, Claude, ChatGPT, FigJam
