# Prabhas Gade

832-759-3256 | prabhasgade333@gmail.com | linkedin.com/in/prabhasgade | github.com/PrabhasG550 | studiorain.xyz

## Education

**University of Texas at Dallas** May 2027

*B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship* *Richardson, TX*

- **Coursework:** Human–Computer Interaction, Data Structures & Algorithms, Computer Vision, Computer Networks, Computer Architecture

## Experience

**Vinson Process Controls** May–Aug. 2025; May–Aug. 2026

*Software Engineering Intern* *Richardson, TX*

- Built a responsive React.js/Tailwind CSS interface for an edge-computing RTU, integrating REST and MySQL data into real-time monitoring and configuration workflows that reduced manual operator checks.
- Designed a reusable shortcut-overview system that surfaced equipment statistics and controls in fewer interactions, improving user efficiency by 1200% and lowering labor spent on routine device management.
- Standardized Docker delivery through CI/CD and container orchestration, reducing deployment friction, environment drift, and repeat engineering effort across two internship terms.

**ThirdSpaceDigital** 2026

*Frontend Developer & Product Designer* *Dallas, TX*

- Designed in Figma and built an interactive React landing experience that attracted 300 users in its first week and sustained roughly 55 daily visits.
- Connected reusable article, event, issue, and archive surfaces to Supabase, retaining recurring traffic for months while reducing manual publishing and third-party tooling needs.

**UTD EPICS Comet Cupboard** Jan.–May 2024

*Developer* *Richardson, TX*

- Rebuilt a nonprofit food-assistance site from Svelte in React TypeScript, creating a more maintainable interface for staff serving students experiencing food insecurity.
- Migrated MongoDB to PostgreSQL/Prisma, cutting query times by 60%; packaged with Docker to reduce staff wait times, environment failures, and deployment effort.

**JPMorgan Chase** Jun.–Aug. 2023

*Software Engineering Intern* *Houston, TX*

- Built a React.js dashboard over Cassandra CQL data that doubled actionable insight output by turning cluster metrics into scannable operational views.
- Presented the reusable visualization to 15+ project managers and earned a 98% performance rating, helping teams identify costly performance risks earlier.

## Projects

**Tactile** | *React, Figma Plugin API, MediaPipe, WebSockets, FastAPI* Jan. 2026

- Built a gesture-driven Figma plugin that tracks hands at roughly 60 FPS and maps movement to design actions, reducing repetitive mouse work without requiring separate hardware.
- Refined gestures through four rewrites and added four responsive breakpoints plus keyboard/mouse fallback, expanding accessibility and accelerating design iteration.

**T-Moodbile** | *Next.js, Gemini, ElevenLabs, Twilio, PostgreSQL* Nov. 2025

- Designed a Next.js dashboard unifying voice surveys, hourly social signals, daily search trends, alerts, and a resolution queue so support teams can prioritize churn risks from one interface.
- Surfaced sentiment checks every five minutes and a 70% alert threshold, helping employees intervene before negative feedback becomes a costly escalation.

## Technical Skills

**Frontend:** React.js, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Figma, Responsive Design, Accessibility

**Backend & Tools:** FastAPI, Node.js, REST APIs, WebSockets, PostgreSQL, Supabase, MySQL, MongoDB, Docker, Git/GitHub
