Education

University of Texas at Dallas May 2028

B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship *Richardson, TX*

- **Coursework:** Software Engineering, Database Systems, Operating Systems, Linux/Unix, Data Structures & Algorithms, Advanced Algorithms, Computer Networks, Computer Vision

Experience

Vinson Process Controls May–Aug. 2025; May–Aug. 2026

Software Engineering Intern *Richardson, TX*

- Designed, developed, and tested React/Tailwind product features for an industrial edge-computing RTU, integrating REST APIs and MySQL for real-time equipment monitoring and configuration.
- Translated compliance requirements into an EULA acceptance screen and operator needs into shortcut workflows, improving user efficiency by 1200% while supporting reliable industrial operations.
- Collaborated with engineers and cross-functional partners in an Agile delivery team; improved deployment infrastructure through Docker and CI/CD automation to reduce environment failures.

Codeaify Jun.–Aug. 2024

Software Engineering Intern *Dallas, TX*

- Developed Python/FastAPI and PostgreSQL services plus a React interface for applications, compliance guardrails, and PII encryption, improving security and maintainability of client workflows.
- Expanded test automation to 95% coverage with Cucumber, improving AI-engine compliance by 20%; debugged failures and incorporated peer-review feedback to improve code quality.

JPMorgan Chase Jun.–Aug. 2023

Software Engineering Intern *Houston, TX*

- Debugged Cassandra data and performance issues and built a React application that transformed transaction and cluster metrics into actionable operational views, doubling insight output.
- Demoed the solution to 15+ project managers and earned a 98% performance rating, communicating technical findings and incorporating stakeholder feedback.

UTD EPICS Comet Cupboard Jan.–May 2024

Software Engineering Developer *Richardson, TX*

- Rebuilt a nonprofit application from Svelte in React/TypeScript and migrated MongoDB to PostgreSQL/Prisma, reducing query times by 60%.
- Packaged the full stack with Docker and documented repeatable deployment steps, improving software development processes, maintainability, and team onboarding.

Projects

MudraDetection | *Python, PyTorch, ONNX, TensorRT, NVIDIA Jetson* 2025

- Developed and tested an edge-computing vision application from data collection through hardware deployment; automated model evaluation using accuracy, precision, recall, and F1 metrics.
- Troubleshot latency and classification issues and optimized ResNet-18 inference with ONNX/TensorRT, enabling responsive operation without cloud connectivity.

Tactile | *React, FastAPI, WebSockets, MongoDB, MediaPipe* Jan. 2026

- Designed and demoed a real-time gesture product, iterating through four interaction revisions and debugging recognition thresholds to improve performance and usability.

Technical Skills

Languages & Frameworks: Python, Java, C++, C#, JavaScript, TypeScript, SQL, React, FastAPI, Node.js, REST APIs

Testing & Delivery: Test Automation, Unit Testing, Cucumber, Code Review, Peer Review, Debugging, Troubleshooting, CI/CD, Docker, Git/GitHub

Engineering: Product Features, Infrastructure, Deployment, Agile Methodologies, Jira, MySQL, PostgreSQL, MongoDB, AWS, Google Cloud
