Education

University of Texas at Dallas May 2028

B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship *Richardson, TX*

- **Coursework:** Data Structures & Algorithms, Advanced Algorithms, Software Engineering, Database Systems, Operating Systems, Computer Networks, Statistics, Computer Vision

Experience

JPMorgan Chase Jun.–Aug. 2023

Software Engineering Intern *Houston, TX*

- Collaborated with engineers, managers, and stakeholders to design, develop, and troubleshoot a React/Cassandra visualization that doubled actionable insight output from transaction and cluster data.
- Demonstrated strong written and verbal communication skills by presenting the solution to 15+ project managers (98% performance rating) and documenting findings for follow-up.

Vinson Process Controls May–Aug. 2025; May–Aug. 2026

Software Engineering Intern *Richardson, TX*

- Wrote secure, high-quality React/Tailwind and REST/MySQL code for industrial monitoring product features across the software development life cycle, from design through production deployment.
- Applied automation and modern tooling (Docker, CI/CD) in an Agile team to reduce manual deployment effort and improve delivery reliability; improved user efficiency by 1200% with a shortcut workflow.

Codeaify Jun.–Aug. 2024

Software Engineering Intern *Dallas, TX*

- Developed Python/FastAPI and PostgreSQL services plus a React UI for LLM guardrails and PII encryption, applying problem-solving and secure coding practices to client compliance workflows.
- Expanded automated testing to 95% coverage with Cucumber, validated outputs through peer review, and improved AI-engine compliance by 20% while reducing production defects.

UTD EPICS Comet Cupboard Jan.–May 2024

Software Engineering Developer *Richardson, TX*

- Delivered technology with real-world social impact for a nonprofit addressing student food insecurity, replatforming Svelte to React/TypeScript and MongoDB to PostgreSQL/Prisma (60% faster queries).
- Used refactoring and Docker packaging to improve maintainability, fostering innovation in a collaborative, mentor-supported project environment.

Projects

Tactile | *React, FastAPI, WebSockets, MongoDB, MediaPipe, GitHub Copilot, Claude* Jan. 2026

- Solved an open-ended product problem by shipping a Figma plugin that maps real-time gestures to design actions; iterated four gesture-map redesigns based on feedback and accessibility needs.
- Leveraged AI development tools (GitHub Copilot, Cursor, Claude) for coding, debugging, and documentation, critically evaluating AI-generated outputs before peer review and final delivery.

T-Moodbile | *Node.js, Next.js, PostgreSQL, Gemini, Data Science* Nov. 2025

- Applied data science methods to multi-source sentiment analysis—aggregating surveys, social, and trend data—then automated monitoring and alerting to deliver reliable, actionable nonprofit-style insights.

Technical Skills

Languages & Systems: Java, Python, JavaScript, TypeScript, C++, SQL, React, FastAPI, Node.js, REST APIs, PostgreSQL, MySQL, MongoDB, Cassandra
Engineering: Software Development Life Cycle, Agile, Automated Testing, Refactoring, Peer Review, Secure Coding, Docker, CI/CD, Git/GitHub, Problem-Solving
AI & Collaboration: AI Development Tools, GitHub Copilot, Cursor, Claude, ChatGPT, Data Science, Written and Verbal Communication Skills, Fostering Innovation
