Education

University of Texas at Dallas May 2028
B.S. Computer Science (STEM), Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship *Richardson, TX*

- **Coursework:** Software Engineering, Computer Architecture, Digital Logic, Operating Systems, Linux/Unix, Data Structures & Algorithms, Discrete Mathematics, Linear Algebra, Statistics, Computer Networks, Computer Vision

Experience

Vinson Process Controls May–Aug. 2025; May–Aug. 2026
Software Engineering Intern *Richardson, TX*

- Designed and developed software from functional and interface requirements for an industrial edge-computing RTU, integrating a React/Node.js/Tailwind UI with REST APIs and MySQL for real-time monitoring.
- Performed system integration of UI, services, and persistent data in an Agile team; debugged hardware–software interface issues in lab-like device environments; improved operator efficiency by 1200% with a shortcut workflow.
- Created and maintained automated unit tests and CI/CD pipeline checks in Visual Studio Code and Git; developed requirement-based test procedures for configuration and monitoring features before production deployment.

Codeaify Jun.–Aug. 2024
Software Engineering Intern *Dallas, TX*

- Wrote Python services and React product features for compliance guardrails and PII encryption; applied software and hardware debugging practices across API and client failures.
- Maintained Cucumber unit and integration tests to 95% coverage and executed test procedures that improved AI-engine compliance by 20% while reducing production defects.

JPMorgan Chase Jun.–Aug. 2023
Software Engineering Intern *Houston, TX*

- Debugged Cassandra cluster and transaction data issues and built a React visualization that verified software performance through metric analysis, doubling actionable insight output.
- Collaborated with engineers and stakeholders to document findings and present verified results to 15+ project managers (98% performance rating).

UTD EPICS Comet Cupboard Jan.–May 2024
Software Engineering Developer *Richardson, TX*

- Completed system integration of a nonprofit application after migrating Svelte to React/TypeScript and MongoDB to PostgreSQL/Prisma, cutting query times by 60%.

Projects

MudraDetection | *Python, C++, PyTorch, ONNX, TensorRT, NVIDIA Jetson* 2025

- Developed embedded computer-vision software on Jetson Orin Nano from camera interface requirements through on-device inference; optimized ResNet-18 with TensorRT for GPU-accelerated performance.
- Created unit tests and evaluation procedures using accuracy, precision, recall, and F1; verified coverage across held-out and live webcam scenarios and documented failure modes.

Project Pawrkour | *C#, Unity, Visual Studio, ShaderLab* 2024

- Designed and debugged C# gameplay systems in Visual Studio for wall-running and animation blending; verified component behavior through iterative lab-style playtesting and camera/collision integration fixes.

Technical Skills

Languages: C, C#, C++, Python, Java, JavaScript, TypeScript, SQL
Frameworks & Tools: React, Angular, Node.js, Django, Visual Studio, Eclipse, Git, Docker, CI/CD, Linux/Unix
Systems & Verification: Software Development, Embedded Systems, System Integration, Unit Testing, Test Procedures, Test Coverage Analysis, Debugging, Agile, Mathematics (Discrete Math, Linear Algebra, Statistics), STEM
