Education

University of Texas at Dallas May 2027
B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship *Richardson, TX*

- **Coursework:** Software Engineering, Database Systems, Operating Systems, Data Structures & Algorithms, Advanced Algorithms, Computer Networks, Computer Vision

Experience

Vinson Process Controls May–Aug. 2025; May–Aug. 2026
Software Engineering Intern *Richardson, TX*

- Designed, coded, and tested React/Tailwind features across the full development lifecycle, shipping production deployments that delivered secure, scalable real-time monitoring for operators.
- Partnered with Design, Product, and DevOps in an Agile team to improve user efficiency by 1200%; automated CI/CD packaging to support reliable system design and lifecycle management.

Codeaify Jun.–Aug. 2024
Software Engineering Intern *Dallas, TX*

- Investigated large language models (LLMs) and machine learning frameworks to build Python/FastAPI guardrails and PII encryption services with a React frontend.
- Wrote unit tests to 95% coverage and followed coding standards through code review, improving AI-engine compliance by 20% while reducing production defects.

JPMorgan Chase Jun.–Aug. 2023
Software Engineering Intern *Houston, TX*

- Built a React/Cassandra data visualization feature that turned high-volume transaction and cluster analytics into actionable views, doubling insight output at scale.
- Collaborated across engineering managers and stakeholders (98% performance rating) to diagnose distributed data-performance issues and improve monitoring.

UTD EPICS Comet Cupboard Jan.–May 2024
Software Engineering Developer *Richardson, TX*

- Adapted quickly in an ambiguous nonprofit environment, replatforming Svelte to React/TypeScript and MongoDB to PostgreSQL/Prisma, cutting query times by 60%.
- Partnered with Design, Product, and QA stakeholders and packaged Docker/DevOps delivery for consistent, production-ready deployments.

Projects

T-Moodbile | *Go, Node.js, React, Angular, Vue.js, LLMs, Gemini, PostgreSQL* Nov. 2025

- Designed and deployed an end-to-end LLM-powered sentiment platform with Go/Node.js services and React/Angular/Vue.js clients, solving complex technical challenges from design through production.
- Operated analytics ingestion and alerting at recurring scale, using root-cause analysis and Selenium automation to keep distributed event pipelines reliable.

Project Pawrkour | *Unity, C#, ShaderLab* 2024

- Shipped a complete third-person game level with state-driven running, jumping, and wall-running; debugged corner, angle, and transition edge cases to keep traversal responsive.
- Implemented animation blending, a custom fragment shader, camera-collision fixes, high-fidelity UI, and speed-reactive audio to improve gameplay readability and immersion.

Technical Skills

Languages: C#, Lua, Java, Go, Ruby, Swift, Node.js, Python, C++, JavaScript, TypeScript, SQL
Systems & Frameworks: React.js, Angular, Vue.js, FastAPI, REST APIs, WebSockets, Distributed Systems, System Design, PostgreSQL, MySQL, MongoDB, Cassandra
Engineering: Software Engineering, Full Development Lifecycle, Production Deployment, DevOps, CI/CD, Docker, AWS, Git, Unit Testing, QA, Agile, LLMs, Machine Learning Frameworks, Coding Standards
