# Prabhas Gade

832-759-3256 | prabhasgade333@gmail.com | linkedin.com/in/prabhasgade | github.com/PrabhasG550 | studiorain.xyz

## Education

**University of Texas at Dallas** May 2027
*B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship* *Richardson, TX*

- **Coursework:** Data Structures & Algorithms, Software Engineering, Database Systems, Operating Systems, Object-Oriented Design, Computer Networks

## Experience

**Vinson Process Controls** May–Aug. 2025; May–Aug. 2026
*Software Engineering Intern* *Richardson, TX*

- Designed serverless AWS microservices for real-time device monitoring so equipment issues surface before downtime; a React/Node.js shortcut workflow improved efficiency by **1200%**.
- Shipped an EULA compliance gate and standardized Agile CI/CD, cutting environment drift and the cost of broken releases across two terms.

**Codeaify** Jun.–Aug. 2024
*Software Engineering Intern* *Dallas, TX*

- Built Python APIs plus a JavaScript UI for guardrails and PII encryption, storing data in PostgreSQL and DynamoDB instead of scattered manual handling.
- Raised test automation to **95%** coverage, improving compliance by **20%** and cutting production defects and time spent debugging client issues.

**JPMorgan Chase** Jun.–Aug. 2023
*Software Engineering Intern* *Houston, TX*

- Turned Cassandra transaction data into a React view that **doubled** actionable insight and replaced repetitive manual analysis for operations teams.
- Presented the system to **15+** project managers (**98%** rating), helping teams catch performance risks before they became costly incidents.

**UTD EPICS Comet Cupboard** Jan.–May 2024
*Software Engineering Developer* *Richardson, TX*

- Rebuilt a nonprofit food-assistance platform into React and PostgreSQL microservices, cutting query times by **60%** during high-demand service.
- Packaged delivery with Docker, reducing environment failures and the time required to onboard the next developers.

## Projects

**T-Moodbile** | *Node.js, JavaScript, AWS, PostgreSQL, Gemini* Nov. 2025

- Built a customer-sentiment platform that runs AI voice surveys, scrapes social/search signals, and stores insights so support teams can see how customers feel without manual analysis.
- Checked overall sentiment every five minutes against a **70%** threshold and sent deduplicated alerts, flagging decline before preventable churn.

**Tactile** | *React, FastAPI, WebSockets, MongoDB, MediaPipe* Jan. 2026

- Built a Figma plugin that turns live hand gestures into design actions, streaming roughly **60 FPS** events over WebSockets so users can move and edit frames without a mouse.
- Debugged recognition thresholds across four architecture iterations so false triggers stopped breaking the product workflow.

## Technical Skills

**Languages:** Java, Python, JavaScript, C#, Node.js, TypeScript, SQL
**Cloud & Architecture:** AWS, Serverless, Lambda, DynamoDB, S3, microservices, REST APIs, CI/CD, Docker, Git/GitHub
**Engineering:** test automation, Agile, debugging, testing, data structures, algorithms, object-oriented design, Generative AI
