Southwest Airlines Technology Recruiting
Associate Technology Analyst – Direct College Hire Program
Technology Vendor Management
Cohorts beginning January, June, and August 2027

Dear Southwest Airlines Recruiting Team,

I am applying for the Associate Technology Analyst role supporting Technology Vendor Management in Southwest's Technology Direct College Hire Program. I will complete a B.S. in Computer Science at the University of Texas at Dallas in May 2027 (GPA 3.5) and am most interested in the June or August 2027 cohort. I can work remotely from Texas. I want to help Technology Teams plan resources, measure vendor and program performance, and turn data into decisions that keep delivery on track.

What draws me to Technology Vendor Management is the bridge between Technology, Supply Chain, Finance, and external partners. Airlines run on trust, and that trust depends on clear reporting, careful cost analysis, and processes that help teams secure what they need without waste. I am excited to analyze data, document requirements, and contribute to workforce planning, vendor performance, reporting, and contract-optimization initiatives.

At Vinson Process Controls, I gathered requirements from operators and leaders, compared alternatives, and helped ship AWS-backed monitoring workflows that surfaced issues before downtime. A process redesign I supported improved efficiency by 1200% and cut repeat manual cost. At Codeaify, I used Python and SQL with PostgreSQL and DynamoDB to close compliance gaps and raised automated test coverage to 95%, reducing costly rework. At JPMorgan Chase, I analyzed transaction metrics, built a reporting view that doubled actionable insight, and presented recommendations to 15+ project managers before escalations grew.

I am comfortable with Python, SQL, Java, and JavaScript; AWS services including Lambda, S3, and DynamoDB; and reporting tools such as Power BI and Excel. I work well in Agile, Customer-service-minded teams, manage multiple varied workstreams, and communicate clearly in writing and conversation. I would welcome growing on the Technology Vendor Management Team—learning how Southwest evaluates performance, cost, and contracts while strengthening analytical and problem-solving skills.

Thank you for your time. I would be glad to support Southwest Technology with the same concern, respect, and caring attitude Employees share with every Customer.

Sincerely,
Prabhas Gade
