Education

University of Texas at Dallas May 2027
B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship *Richardson, TX*

- **Coursework:** Software Engineering, Database Systems, Data Structures & Algorithms, Operating Systems, Computer Networks, Object-Oriented Design

Experience

Vinson Process Controls May–Aug. 2025; May–Aug. 2026
Software Engineering Intern *Richardson, TX*

- Gathered requirements from operators and Technology Leaders, then translated business needs into AWS-backed monitoring workflows that surfaced equipment issues before downtime.
- Partnered cross-functionally in Agile delivery to redesign a high-friction process; a React/Node.js shortcut improved efficiency by **1200%** and cut repeat manual cost.

Codeaify Jun.–Aug. 2024
Software Engineering Intern *Dallas, TX*

- Analyzed compliance gaps and built Python/SQL services on PostgreSQL and DynamoDB for guardrails and PII encryption, replacing scattered manual handling.
- Raised automated test coverage to **95%**, improving compliance by **20%** and reducing defects that drove costly rework; documented requirements and verification steps.

JPMorgan Chase Jun.–Aug. 2023
Software Engineering Intern *Houston, TX*

- Analyzed Cassandra transaction metrics and shipped a React reporting view that **doubled** actionable insight versus repetitive manual review.
- Presented findings to **15+** project managers (**98%** rating), articulating root causes and recommendations that reduced escalation risk.

UTD EPICS Comet Cupboard Jan.–May 2024
Software Engineering Developer *Richardson, TX*

- Modeled and redesigned nonprofit food-assistance workflows into React and PostgreSQL services, cutting query times by **60%** during peak demand.
- Managed multiple workstreams with staff stakeholders and documented delivery steps that shortened onboarding for the next developers.

Projects

T-Moodbile | *Python, SQL, JavaScript, AWS, Power BI, Excel, PostgreSQL, Gemini* Nov. 2025

- Built a customer-sentiment reporting platform that ingests surveys and social/search signals so teams can identify trends without manual spreadsheet analysis.
- Visualized KPIs in Power BI and Excel; monitored five-minute checks against a **70%** threshold with deduplicated alerts before preventable churn.

Tactile | *React, FastAPI, JavaScript, MongoDB, MediaPipe* Jan. 2026

- Applied systems thinking and root-cause analysis across four architecture iterations so false gesture triggers stopped interrupting a live Figma workflow at roughly **60 FPS**.

Technical Skills

Languages & Scripting: Python, SQL, Java, JavaScript, Node.js, TypeScript, C#
Cloud & Data: AWS (Lambda, S3, DynamoDB), PostgreSQL, MySQL, Cassandra, Power BI, Excel, data visualization, reporting
Analysis & Delivery: business analysis, requirements gathering, process improvement, Agile, stakeholder communication, cost/efficiency analysis, root cause analysis
