# Prabhas Gade

832-759-3256 | prabhasgade333@gmail.com | linkedin.com/in/prabhasgade | github.com/PrabhasG550 | studiorain.xyz

## Education

**University of Texas at Dallas** May 2028

*B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship* *Richardson, TX*

- **Coursework:** Software Engineering, Database Systems, Operating Systems, Data Structures & Algorithms, Computer Networks, Computer Vision, Statistics, Linear Algebra

## Experience

**Vinson Process Controls** May–Aug. 2025; May–Aug. 2026

*Software Engineering Intern* *Richardson, TX*

- Built a React/Tailwind application for an industrial edge-computing RTU, integrating REST APIs and MySQL to support real-time equipment data management, evaluation, and presentation.
- Translated regulatory requirements into an EULA acceptance screen and operator needs into monitoring workflows, improving user efficiency by 1200% while supporting reliable field decisions.
- Collaborated with an Agile engineering team and automated Docker/CI/CD delivery, reducing deployment failures, maintenance effort, and total cost of ownership.

**JPMorgan Chase** Jun.–Aug. 2023

*Software Engineering Intern* *Houston, TX*

- Queried and evaluated Cassandra transaction and cluster data, transforming technical metrics into a React visualization that doubled actionable insight output.
- Prepared and presented findings to 15+ project managers, earning a 98% performance rating and enabling earlier identification of costly performance risks.

**Codeaify** Jun.–Aug. 2024

*Software Engineering Intern* *Dallas, TX*

- Developed Python/FastAPI and PostgreSQL services plus a React interface for applications, compliance guardrails, and PII encryption, centralizing client data workflows.
- Expanded automated test coverage to 95% with Cucumber, improving AI-engine compliance by 20% and reducing production defects and debugging time.

**UTD EPICS Comet Cupboard** Jan.–May 2024

*Software Engineering Developer* *Richardson, TX*

- Migrated MongoDB to PostgreSQL/Prisma and evaluated query performance, reducing response times by 60% for a nonprofit serving students experiencing food insecurity.
- Rebuilt the application in React/TypeScript and packaged it with Docker, improving maintainability and repeatable delivery for future project teams.

## Projects

**MudraDetection** | *Python, PyTorch, ResNet-18, ONNX, TensorRT, NVIDIA Jetson* 2025

- Managed and labeled image data across varied lighting and camera angles; evaluated an edge-vision model using an 80/20 split, accuracy, precision, recall, and F1 metrics.
- Deployed GPU-accelerated inference on field hardware and documented results, failure modes, and specifications in a technical presentation for engineering and installation use.

**T-Moodbile** | *Python, Node.js, PostgreSQL, Next.js, Google Cloud* Nov. 2025

- Aggregated, evaluated, and presented survey, social, and search-trend data in a dashboard with scheduled alerts, turning multi-source records into actionable client insights.

## Technical Skills

**Programming & Data:** Python, Java, C++, JavaScript, TypeScript, SQL, React, FastAPI, REST APIs, MySQL, PostgreSQL

**Engineering:** Data Entry, Data Management, Data Evaluation, Data Presentation, Technical Documentation, Research, Agile, Jira, Git/GitHub, Docker, CI/CD

**Productivity & Design:** Microsoft Office, Excel, Word, PowerPoint, AutoCAD, Computer-Aided Design (CAD; robotics), Figma
