Education

University of Texas at Dallas May 2028

B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship *Richardson, TX*

- **Coursework:** Software Engineering, Database Systems, Operating Systems, Linux/Unix, Data Structures & Algorithms, Computer Networks

Experience

Vinson Process Controls May–Aug. 2025; May–Aug. 2026

Software Engineering Intern *Richardson, TX*

- Designed and implemented a React/Tailwind interface for an edge-computing RTU, integrating REST APIs and MySQL to deliver high-performance, scalable, secure real-time monitoring workflows.
- Improved user efficiency by 1200% with a shortcut-overview system; built CI/CD automation and Docker packaging for lifecycle management in an Agile team that lowered total cost of ownership.

Codeaify Jun.–Aug. 2024

Software Engineering Intern *Dallas, TX*

- Developed Python/FastAPI and PostgreSQL microservices plus a React frontend for applications, LLM guardrails, and PII encryption, improving security and maintainability.
- Wrote automated tests to 95% coverage with Cucumber in an Agile team, participated in code and design review, improved AI-engine compliance by 20%, and reduced production defects and debugging time.

JPMorgan Chase Jun.–Aug. 2023

Software Engineering Intern *Houston, TX*

- Queried Cassandra metadata and built a React dashboard that transformed transaction and cluster metrics into operational views, doubling insight output and reducing manual analysis.
- Collaborated with 15+ project managers (98% performance rating) to monitor systems capacity and resolve frequently encountered performance risks earlier.

UTD EPICS Comet Cupboard Jan.–May 2024

Software Engineering Developer *Richardson, TX*

- Replatformed a nonprofit application from Svelte to React TypeScript and MongoDB to PostgreSQL/Prisma, cutting query times by 60% for staff serving students.
- Packaged the full stack with Docker for repeatable construction, automation, and implementation, reducing environment failures and onboarding effort.

Projects

T-Moodbile | *Node.js, Express, PostgreSQL, Next.js, Gemini, Google Cloud* Nov. 2025

- Built a scalable, event-driven sentiment service with REST APIs, scheduled ingestion, alerts, and a resolution queue; automation replaced manual customer-signal triage.
- Monitored data sources and metrics with five-minute checks against a 70% threshold, debugging alert noise through deduplication to improve reliability.

Tactile | *React, FastAPI, WebSockets, MongoDB, MediaPipe* Jan. 2026

- Led a proof-of-concept for a gesture-driven Figma integration streaming roughly 60 FPS hand-tracking events; iterated architecture across four rewrites for performance and usability.

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, C++, HTML/CSS
Frameworks & Data: React.js, Next.js, Node.js, Express, FastAPI, REST APIs, WebSockets, PostgreSQL, MySQL, MongoDB, Cassandra
Software Engineering: AWS, Google Cloud, Docker, CI/CD Automation, Git/GitHub, Linux/Unix, Agile, Debugging, Unit Testing, Scalable Systems, Architecture, Lifecycle Management, Proof of Concept, Figma
