# Prabhas Gade

832-759-3256 | prabhasgade333@gmail.com | linkedin.com/in/prabhasgade | github.com/PrabhasG550 | studiorain.xyz

## Education

**University of Texas at Dallas** May 2027
*B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship* *Richardson, TX*

- **Coursework:** Data Structures & Algorithms, Advanced Algorithms, Human–Computer Interaction, Computer Networks, Linux/Unix, Computer Architecture

## Experience

**Vinson Process Controls** May–Aug. 2025; May–Aug. 2026
*Software Engineering Intern* *Richardson, TX*

- Owned React/Tailwind web experiences for an edge-computing RTU from UI design through REST/MySQL integration, shipping real-time monitoring and configuration workflows used by equipment operators.
- Prioritized a shortcut-overview system around operator needs, improving user efficiency by 1200%; standardized Docker and CI/CD delivery to reduce deployment effort and environment drift.

**ThirdSpaceDigital** 2026
*Frontend Developer & Product Designer* *Dallas, TX*

- Turned an ambiguous community need into a production React/Supabase platform, designing in Figma and shipping interactive article, event, issue, and photo-archive experiences end-to-end.
- Measured adoption and iterated after launch, attracting 300 users in the first week, sustaining roughly 55 daily visits, and retaining recurring traffic for months.

**Codeaify** Jun.–Aug. 2024
*Software Engineering Intern* *Dallas, TX*

- Developed Python/FastAPI and PostgreSQL services plus a React interface for applications, LLM guardrails, and PII encryption, centralizing client compliance workflows.
- Reached 95% unit-test coverage with Cucumber, improving AI-engine compliance by 20% while reducing production defects and time spent debugging client issues.

**UTD EPICS Comet Cupboard** Jan.–May 2024
*Developer* *Richardson, TX*

- Replatformed a nonprofit web application from Svelte to React TypeScript and MongoDB to PostgreSQL/Prisma, cutting query times by 60% for staff serving students.
- Packaged the full stack with Docker, improving maintainability and creating a consistent delivery path that reduced environment-specific failures and onboarding effort.

**JPMorgan Chase** Jun.–Aug. 2023
*Software Engineering Intern* *Houston, TX*

- Built a React/Cassandra visualization that converted transaction and cluster metrics into actionable operational views, doubling insight output and reducing repetitive analysis.
- Presented the product to 15+ project managers and earned a 98% performance rating, helping stakeholders identify costly performance risks earlier.

## Projects

**T-Moodbile** | *Node.js, Express, PostgreSQL, Next.js, Gemini, Twilio* Nov. 2025

- Shipped an event-driven sentiment product spanning AI voice surveys, ingestion, analysis, alerts, and a resolution queue; five-minute checks against a 70% threshold surfaced churn risks for rapid follow-up.

**Tactile** | *React, FastAPI, WebSockets, MongoDB, MediaPipe* Jan. 2026

- Built a gesture-driven Figma plugin streaming roughly 60 FPS hand-tracking events; iterated through four gesture-map rewrites to improve stability, accessibility, and interaction quality.

## Technical Skills

**Languages:** Python, JavaScript, TypeScript, SQL, Java, C++, HTML/CSS
**Full Stack:** React.js, Next.js, FastAPI, Node.js, Express, REST APIs, WebSockets, PostgreSQL, MySQL, MongoDB, Cassandra
**Engineering:** Docker, CI/CD, AWS, Git/GitHub, Cucumber, Figma, Testing, Responsive Design
