Education

University of Texas at Dallas May 2027

B.S. Computer Science, Minor in Visual Arts; GPA: 3.5; Academic Excellence Scholarship *Richardson, TX*

- **Coursework:** Software Engineering, Database Systems, Operating Systems, Linux/Unix, Data Structures & Algorithms, Advanced Algorithms, Computer Networks

Experience

Vinson Process Controls May–Aug. 2025; May–Aug. 2026

Software Engineering Intern *Richardson, TX*

- Built an end-to-end React/Tailwind and REST/MySQL solution for an edge-computing RTU, delivering optimized, secure, and scalable real-time monitoring aligned with operator and business needs.
- Collaborated cross-functionally in an Agile environment to improve user efficiency by 1200%; automated repeatable delivery with Docker and CI/CD to reduce deployment defects and maintenance cost.

Codeaify Jun.–Aug. 2024

Software Engineering Intern *Dallas, TX*

- Developed Python/FastAPI and PostgreSQL services plus a React application for LLM guardrails and PII encryption, translating product and technology objectives into secure client workflows.
- Applied software engineering and testing best practices to reach 95% unit-test coverage with Cucumber, improving AI-engine compliance by 20% and reducing production debugging time.

JPMorgan Chase Jun.–Aug. 2023

Software Engineering Intern *Houston, TX*

- Built a React/Cassandra data-visualization application that converted payment transaction and cluster metrics into actionable views, doubling insight output and reducing manual analysis.
- Communicated findings to 15+ project managers and earned a 98% performance rating, helping a cross-functional financial-technology team diagnose costly performance risks earlier.

UTD EPICS Comet Cupboard Jan.–May 2024

Software Engineering Developer *Richardson, TX*

- Rebuilt a nonprofit web application from Svelte in React/TypeScript and migrated MongoDB to PostgreSQL/Prisma, optimizing query performance by 60% for staff serving students.
- Containerized the end-to-end solution with Docker, improving version consistency, maintainability, and reliable delivery across development environments.

Projects

T-Moodbile | *Go, Angular, Vue.js, React, Node.js, Selenium, Power BI, Gemini* Nov. 2025

- Built end-to-end sentiment versions spanning Go services, Angular/Vue.js/React frontends, and REST APIs, integrating Generative AI for transcription, sentiment analysis, and prompt-designed insights.
- Automated ingestion and regression coverage with Selenium; visualized customer metrics in Power BI and monitored five-minute alerts to improve root-cause follow-up.

Tactile | *React, FastAPI, WebSockets, MongoDB, MediaPipe* Jan. 2026

- Used root cause analysis to tune gesture thresholds in a roughly 60 FPS Figma integration, completing four architecture iterations to improve performance, stability, and usability.

Technical Skills

Languages & Web: Java, Python, C++, C#, .NET, Go, JavaScript, TypeScript, React.js, Angular, Vue.js, Next.js, Node.js

Cloud, APIs & Data: AWS, Google Cloud, REST APIs, MySQL, PostgreSQL, MongoDB, Cassandra, Power BI, Data Visualization

Engineering & AI: Git Version Control, Docker, CI/CD Automation, Selenium, Cucumber, Unit Testing, Agile, Code Review, Root Cause Analysis, Generative AI, Prompt Design
