EDUCATION

University of Texas at Dallas

Graduating May 2027

- *Bachelor of Science in Computer Science - Academic Excellence Scholarship Recipient*

GPA: 3.5

Related Courses: Data Structures and Algorithms, Advanced Algorithms and Analysis, Digital Logic, Computer Architecture, Linux/Unix, Discrete Math, Linear Algebra

WORK EXPERIENCE

Vinson Process Controls- Software Engineering Intern - Richardson, TX

May 2025 - August 2025

- Built a responsive **React.js** UI with **TailwindCSS** for an Edge Computing RTU in a cross-functional team of 10, integrating a **RESTful API** and **MySQL** to support real-time device monitoring, configuration, and persistent data storage.
- Used **Docker** and **DevOps** practices (CI/CD, version control, container orchestration) to ensure scalable deployment and streamlined development workflows.
- Built a Widget System which increased screen capacity from 1 to 12 screens at once, increasing user efficiency by 1200%.

Codeaify - Software Engineering Intern - Dallas, TX

June 2024 - August 2024

- Developed **RestfulAPI** using **Python**, **FastAPI**, **Flask**, and **PostgreSQL**, enhancing data management and efficiency
- Built and integrated a UI with **React.js** to display instances of Applications, Guardrails, and PII encryption.
- Conducted SaaS **Unit Testing** with 95% coverage on Guardrails and PII Encryptions built with **LangChain** for Large Language Models using **Cucumber**, improving risk management and compliance of client AI engines by over 20%.

UTD EPICS Comet Cupboard - Developer - Richardson, TX

January 2024 - May 2024

- Utilized **React Typescript** and **PostgreSQL** to develop a functional website for UTD Comet Cupboard, a nonprofit organization which aims to provide food items for students facing food insecurity
- Migrated the project's previous progress from Svelte to React Typescript and **MongoDB** to PostgreSQL and **Prisma**, reducing database query times by 60% and solving incompatibilities, and packaged the project on **Docker**

JP Morgan Chase - Software Engineering Intern - Houston, TX

June 2023 - August 2023

- Extracted key metrics from a **Cassandra NoSQL** database to analyze bank transaction data, resulting in a 100% improvement in actionable insights through data driven strategies.
- Partitioned data, derived cluster size, and projected growth rates using **Cassandra CQL** and **React Javascript** for a seamless UI interaction with cluster data, and the **Agile** iterative approach to conduct team meetings effectively.
- Presented UI to 15+ JPMC project managers and communicated cluster data metrics with a 98% performance rating

PROJECTS

HackUTD T-Mobile Track: T-Moodbile - Richardson TX

November 2025

- Designed a web application on **Figma** with a team of two others that provides accurate sentiment tracking and analysis of customers through a combination of web scraping social media and surveys using an AI phone calling tool, and generates insights to improve sentiment
- Implemented AI phone call with **Eleven-Labs**, webscraping insights with **Google-Cloud API**, and survey insights with **Gemini API**.

Coding For Medicine - Co-Founder & Vice President - Sugarland, TX

August 2020 - March 2023

- Co-founded a virtual Bioinformatics club where we conducted COVID-19 genetics research, published a paper on non-photosynthetic plant evolution, and led global outreach. Helped 14 new chapters start up around the world.
- Developed a **Python** program utilizing **Biopython**, **MUSCLE**, and **NCBI BLAST** for the publication to decode DNA genomes and protein segments and created an algorithm to calculate the dn/ds ratios of plants to measure susceptibility of mutation: "Unique Loss of Photosynthetic Functions and Unusually Low GC Content in the Minimized Plastids found in Holoparasitic Plants," Zenodo, Jan 27th, 2023

TECHNICAL SKILLS

- **Languages:** Javascript, Typescript, HTML/CSS, SQL, Java, Python, C++, C#
- **Frameworks/Libraries:** React.js, Next.js, FastAPI, Flask, Node.js, TailwindCSS, Cucumber
- **Tools:** Figma, Docker, AWS, Git/GitHub, PostgreSQL, MySQL, MongoDB, Cassandra, Jira
