EDUCATION

University of Texas at Dallas

Graduating 2027

Bachelor of Science in Computer Science, Minor in Visual Arts

Richardson, TX

- Academic Excellence Scholarship Recipient GPA: 3.5
- **Relevant Courses:** Data Structures & Algorithms, Advanced Algorithms, Digital Logic, Computer Architecture, Linux/Unix, Discrete Math, Linear Algebra, Computer Networks, Computer Vision, PL Paradigms

EXPERIENCE

Vinson Process Controls

May 2025 – August 2025

Software Engineering Intern

Richardson, TX

- Built a responsive React.js/TailwindCSS UI for an Edge Computing RTU, integrating a RESTful API and MySQL to support real-time device monitoring, configuration, and persistent data storage.
- Implemented a Widget System scaling screen capacity from 1 to 12 simultaneous screens, increasing user efficiency by 1200%.
- Containerized application with Docker using CI/CD pipelines and container orchestration for scalable deployment.

Codeaify

June 2024 – August 2024

Software Engineering Intern

Dallas, TX

- Developed a RESTful API using Python, FastAPI, and PostgreSQL and a React.js UI for managing Applications, Guardrails, and PII encryption.
- Achieved 95% unit test coverage on LangChain-based LLM guardrails and PII encryption using Cucumber, improving client AI engine compliance by 20%.

UTD EPICS Comet Cupboard

January 2024 – May 2024

Developer

Richardson, TX

- Built a full-stack site with React TypeScript and PostgreSQL for a nonprofit addressing student food insecurity.
- Migrated codebase from Svelte to React TypeScript and MongoDB to PostgreSQL/Prisma, cutting query times by 60%; packaged on Docker.

JP Morgan Chase

June 2023 – August 2023

Software Engineering Intern

Houston, TX

- Extracted key metrics from a Cassandra NoSQL database to analyze transaction data, improving actionable insights by 100% through data-driven strategies.
- Built a React.js UI for cluster data visualization using Cassandra CQL; presented to 15+ project managers with a 98% performance rating.

PROJECTS

HackUTD – T-Mobile Track: T-Moodbile | *Eleven-Labs, Google Cloud API, Gemini API*

November 2025

- Designed a sentiment tracking platform combining AI phone calls (Eleven-Labs), social media scraping (Google Cloud API), and survey analysis (Gemini API) to surface customer insights.
- Collaborated with a team of three to design the full application flow and interface on Figma.

Tactile | *React, FastAPI, MediaPipe, WebSockets, MongoDB*

January 2026

- Built a gesture-driven Figma plugin using MediaPipe hand tracking to map real-time gestures to design actions, enabling touchless UI manipulation within the editor.
- React frontend streams gesture events via WebSockets to a FastAPI backend with MongoDB persistence; led full UI/UX and landing page design at Hack AI 2026.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS, SQL, Java, Python, C++, C#

Frameworks & Libraries: React.js, Next.js, FastAPI, Flask, Node.js, TailwindCSS, Cucumber

Tools: Figma, Docker, AWS, Git/GitHub, PostgreSQL, MySQL, MongoDB, Cassandra, Jira
